RE: Water Supply Assessment  
Panorama Point Planned Development

PLANNING/BUILDING  
DIVISIONS

Dear Mr. Mull

This letter is in response to the Water Supply Assessment prepared by Shasta County in regards to the Panorama Point Planned Development.

The Cottonwood Water District's management has completed its review of the Water Assessment report and the potential water demand the proposed project would place on the Cottonwood Water Districts. The Cottonwood Water District has direct access to high yielding aquifers that underline the area in question. Considering the infrastructure needed to facilitate this project and the abundance of water available this project has the approval of the Cottonwood Water District providing all infrastructure improvements be met before water delivery..

On Wednesday, August 12, 2009 at the regularly scheduled Board Meeting, the Cottonwood Water Districts Board of Directors discussed the report and its contents at length and unanimously made a motion to approve the Water Assessment Report as written.

Sincerely

Kris Hollmer  
District Manager
