

Mercy Family Health Center and Family Practice Residency Program provides comprehensive international travel medicine consultation to individuals, families and groups. We are a Yellow Fever Certified Site and will offer affordable pricing on consultation fees and vaccinations to travelers.

Services will be devoted to the health of travelers and focuses primarily on pre- travel preventative care of persons traveling to foreign countries and will address post travel concerns. We look forward to working closely with primary care physicians, churches and schools in the community to coordinate quality pre and post travel care.

The recommendations for pre-travel medicine are individualized and specialized depending upon travel plans. Patients will receive a customized, travel health consultation. Physicians and registered nurses will assess individual travel needs based on health history, specific itinerary, planned activities and type and duration of travel.

Patients will receive any necessary prescriptions and most vaccinations will be administered in one visit. The importance and rationale for each recommended immunization and medication will be discussed. Patients will receive an official immunization record to keep with travel documents, as well as printed information on precautionary measures to stay healthy while traveling.

For international travel questions for providers or patients or to schedule an appointment please contact our office at 530-225-7842.
