CAL FIRE Suspends Burn Permits in Shasta and Eastern Trinity Counties

Redding – After a wet winter, warming temperatures are quickly drying out the abundant annual grass crop. The increasing fire danger posed by the high volume of dead grass and hotter, drier conditions in the region is prompting CAL FIRE to suspend all burn permits for outdoor residential burning within the State Responsibility Area of Shasta and Eastern Trinity counties. This suspension takes effect **June 26, 2017** and bans all residential outdoor burning of landscape debris such as branches and leaves.

“We are asking that residents not be lulled into a false sense of security on the heels of an exceptionally wet winter,” said Chief Ken Pimlott, CAL FIRE director. “The abundant dead grass will only serve as a fuse to the heavier vegetation still suffering the lasting effects of 5 years of extreme drought.”

“Creating and maintaining defensible space is very important to protect your home in the event of a wildfire. We appreciate the commitment of local residents to being prepared and fire safe when they are working outdoors with powered equipment in these dry conditions,” said Chief Mike Hebrard, Shasta-Trinity Unit Chief.

Since January 1, 2017, CAL FIRE and firefighters across the state have already responded to over 1,900 wildfires. While outdoor burning of landscape debris by homeowners is no longer allowed, CAL FIRE is asking residents to ensure that they are prepared for wildfires by maintaining a minimum of 100 feet of Defensible Space around every home and building on their property.

Here are some tips to help prepare homes and property:

- Clear all dead and or dying vegetation 100 feet from around all structures
- Landscape with fire resistant/drought tolerant plants
- Find alternative ways to dispose of landscape debris like chipping or hauling it to a biomass energy or green waste facility

The department may issue restricted temporary burning permits if there is an essential reason due to public health and safety. Agriculture, land management, fire training, and other industrial-type burning may proceed if a CAL FIRE official inspects the burn site and issues a special permit.

-more-

The suspension of burn permits for residential landscape debris does not apply to campfires within organized campgrounds or on private property. Campfires may be permitted if the campfire is maintained in such a manner as to prevent its spread to the wildland. A campfire permit can be obtained at local fire stations or online at PreventWildfireCA.org.
