(2013 CRC – Permit applications submitted on or after January 1, 2014)

- 1) Ducts in the garage that penetrate the separation must be a minimum of 26-gauge steel with no openings in the garage.
- 2) Horizontal attic access through the required separation will require a door as specified above or a plywood backed sheetrock hinged access panel with a handle on the attic side so installed that it will remain closed. For example, positioned so that when it is opened, it will not pass vertical and close when released.
