CURRENT SITUATION

- We had 27 cases Thursday, including 15 men, 11 women and 1 person of unknown gender:
 - 9 people in their 20s
 - 5 people in their 30s
 - 1 person in their 40s
 - 5 people in their 50s
 - 4 people in their 60s
 - 1 person in their 70s
 - 2 people in their 80s
- **SECOND DOSE CLINICS:**
 - If you got your first dose of Moderna at the Shasta Lake Community Center on Jan. 30 (or earlier), you can get your second dose tomorrow (Saturday) at the City of Shasta Lake Community Center, 4499 Main St. Last names of N-Z, arrive between 10 a.m. and noon. Last names of A-M, arrive between noon and 2 p.m.
 - School staff who got their vaccines Feb. 13 at Vibra can return for a second-dose clinic on March 6, and those vaccinated Feb. 20 can return for their second dose on March 13. Specific times are at www.ShastaReady.org – click “Vaccinations.”
 - Please bring your CDC card and **wear a short-sleeved shirt**. Find information about other second-dose clinics at www.ShastaReady.org; click on “Vaccinations.”
- Our “strike team” pilot project got off to a successful start yesterday, vaccinating 10 older adults who are unable to leave their homes. They were referred by Adult Protective Services, and the team included two nurses and a support staff member.
- People with certain health conditions are more likely to need to be hospitalized if they get COVID. In Shasta County, 50% of COVID-hospitalized patients have high blood pressure (compared with 36.7% of the general population), 33% percent have cardiac disease (compared with 9% of the general population) and 31% have diabetes (compared with 15.5% of the general population). Smoking (past or current), obesity, chronic kidney disease, asthma, neurological conditions, cancer, stroke, chronic lung disease and being immunocompromised are the other conditions that hospitalized COVID patients have had in Shasta County. Healthy eating and physical activity help improve people’s health – find some tips at www.healthyshasta.org.
