34	2	3

CURRENT SITUATION	
Situation Summary:	<ul style="list-style-type: none"> We have no new positive cases today. Today, we shared a model that projects the impact of COVID-19 on Shasta County based on different levels of compliance with social distancing measures. Our community's efforts to slow this virus down are working. The stay-at-home order, social distancing, isolation/quarantine, and the relentless work of our disease investigators and contact tracing team have kept our numbers low. Our community has made a lot of sacrifices over the past month, and we need to keep it up to protect our most at-risk populations, avoid overwhelming our hospitals, and prevent deaths. More testing is now available in Shasta County. People who are experiencing symptoms of COVID-19 (fever, cough, shortness of breath) should contact their healthcare provider to be tested. Those who don't have a healthcare provider or are having trouble getting a test should call Shasta County Public Health at (530) 225-5591.
