<b>15,437</b>	<b>15,624</b>	<b>6</b>	

### CURRENT SITUATION

<b>Situation Summary:</b>	<ul style="list-style-type: none"> <li>We have 11 new cases today. Ten had symptoms and none are hospitalized. They are a boy under 13, a teenage boy, a woman in her 20s, a man in his 30s, two women in their 40s, a man in his 40s, two men in their 50s, a man in his 70s and a woman in her 70s.</li> <li><b>About the numbers:</b> What counts as a positive test? Our positive tests are only from PCR tests (nasal swabs), not the serology (antibody) tests. There have been instances where someone has tested positive for antibodies and we have followed up with a PCR test to see if the person was currently positive, but we do not count positive tests based on the antibody test alone.</li> <li>The number of counties on the state’s watch list continues to grow, and we must all do our part to prevent the spread of disease in our community and avoid further restrictions. Please wear masks while in public, avoid gatherings, and stay close to home. Many of our recent patients were infected by people who had traveled to (or hosted visitors from) areas of high transmission.</li> </ul>
