| 7                          | 3  | 311           | 356                             |
| Negative Tests 8/5/2020    | Negative Tests to Date                     | Total Tests   | Deaths                          |
| 74                         | 22,859                                     | 23,270        | 9                               |

| CURRENT SITUATION   |  |
|---|--|
| <ul style="list-style-type: none"> <li>We had 7 new cases on Wednesday. Six had symptoms, one is still under investigation, and one is hospitalized. They are:               <ul style="list-style-type: none"> <li>One man in his 20s</li> <li>One woman in her 40s</li> <li>One man in his 40s</li> <li>Two women in their 50s</li> <li>One man in his 60s</li> <li>One man in his 70s</li> </ul> </li> <li><b>By the numbers:</b> Contact tracing is a valuable public health tool to contain outbreaks. Since the beginning of the COVID-19 incident, 84 people who were originally quarantined (because they were close contacts of a patient) were later moved to isolation because they tested positive for COVID-19. These people could have been unknowingly spreading the virus if they were not identified through the contact tracing process. Learn more about isolation, quarantine and contact tracing at <a href="http://ShastaReady.org">ShastaReady.org</a>.</li> <li>People on quarantine must stay at home until they reach the end of their order and they are confirmed to be released, even if they have received a negative test result.</li> <li>The number of tests that we are reporting today is most likely an undercount, due to the data reporting challenges at the state level that were shared earlier this week. There is still no anticipated time for this to be corrected.</li> <li>Anyone can be tested for COVID-19. Go to <a href="http://ShastaReady.org">ShastaReady.org</a> and click on "Get tested" to find out the best option for you.</li> </ul> |  |
