CURRENT SITUATION	
<ul style="list-style-type: none"> We had a total of 10 new cases on Friday, Saturday and Sunday. Seven had symptoms, two are still under investigation and none are hospitalized. They are: <ul style="list-style-type: none"> Three women and one man in their 20s Two women and one man in their 30s One woman in her 40s One man in his 50s One woman over age 89 People may have more serious complications from COVID-19 if they have comorbidities – but what does that really mean? Comorbidities aren't just illnesses like cancer, heart disease and COPD. In Shasta County, 36.7% of residents have hypertension, 33.1% have obesity (BMI of 30+), and 15.5% have diabetes, all of which put people at higher risk for COVID complications. Learn more about the health effects of COVID here. Anyone can be tested for COVID-19. Go to ShastaReady.org and click on "Get tested" to find out the best option for you.
