<b>353</b>	<b>62,421</b>	<b>64,420</b>	<b>31</b>

### CURRENT SITUATION

- We had 12 new cases on Wednesday, including 5 men and 7 women. The new cases are:
  - 3 teenagers
  - 1 person in their 20s
  - 3 people in their 30s
  - 1 person in their 40s
  - 3 people in their 50s
  - 1 person in their 60s
- People may have more serious complications from COVID-19 if they have comorbidities – but what does that really mean? In Shasta County, 36.7% of Shasta County residents have hypertension, 33.1% have obesity (BMI of 30+), and 15.5% have diabetes. All of these things put people at higher risk of complications from COVID-19.
- Since June 1, 85.6% of people who tested positive for COVID-19 had symptoms (among cases where symptom status was known). The most common were fever, headache, cough and muscle aches. If you are sick, please stay home.
- In Shasta County, the average length of stay for a person hospitalized with COVID-19 is 13.7 days for all patients, and 14.6 days for people who only visited the hospital for COVID-related concerns.
- **Anyone can be tested for COVID-19**, with or without symptoms. Go to [ShastaReady.org](https://www.ShastaReady.org) and click “Get tested” to find out the best option for you.
