

# HOME IGNITION ZONE WORKSHOP

## WHEN & WHERE

April 30, Saturday, Palo Cedro - Bishop Quinn Catholic Center, 21893 Old 44 Dr, Palo Cedro.

May 1, Sunday, Burney Intermountain Memorial VFW Hall at 37410 Main Street, Burney

May 2, Monday, Lakehead Lions Club 20814 Mammoth Drive Lakehead

Each Session is about 8-hours long 9am to 5pm

## COST

**FREE!!**  
**Donations Welcome**

## WHAT TO BRING

Wear comfortable walking shoes & clothing & you may want sunscreen. The bulk of the day will be spent indoors but there will be a 1 1/2 hour-long field exercise at the end - depending on the weather.

Food & Drinks will be provided at no cost.

If you are interested in how you can protect your home, family and animals from wildfire, sign up for the 1-day **Home Ignition Zone Workshop** hosted by Shasta County Fire Safe Council.

The events will be held from 9:00 am to 5:00 pm on April 30, 2022 in Palo Cedro, May 1, 2022 in Burney, and May 2, 2022 in Lakehead. These are all-day events.

Homes don't have to burn! Find out how the fuels around your home and buildings can be arranged, modified and designed to be attractive and resist ignition from even severe wildfires. It's NOT a miracle or luck, like the media seems to believe!

## RSVPs are required to attend.

To RSVP, please contact Tom Twist 530.474.1708, Barbara Holder 530.474.3422, [Firesafe@ShingletownCouncil.org](mailto:Firesafe@ShingletownCouncil.org) or [OrFireWiseJaneAndersen@gmail.com](mailto:OrFireWiseJaneAndersen@gmail.com)

This workshop will discuss in detail; the reality and myths of wildfires, the science of how wildfires ignite structures, how wildland/urban disasters occur, the concept of the Home Ignition Zone (HIZ) and the pre-fire actions departments and residents can take to prevent wildfires from destroying their homes and communities. A wildfire home assessment field exercise will also be offered which will assist participants in identifying wildfire hazards in the HIZ and the actions required to mitigate these hazards and reduce the probability of structures igniting.

This information will benefit residents, fire and emergency services, city/county officials, insurance and real estate professionals, and anyone concerned with reducing their exposure to wildfires.

This HIZ Workshop will be instructed by Pat Durland. Pat is a nationally respected and internationally known expert in wildland fire mitigation training and planning programs for agencies, communities and property loss professionals. As a 20-year resident of the fire-prone Boise foothills, Pat and his family have dealt with wildfire both personally and professionally.
